

Fussa Waste Rules: Reduce and Separate Waste

This handout is for the people residing EAST AREA in Fussa-city

FUSSA CITY

Waste DISPOSAL is becoming a serious issue all over Japan. The city of Fussa is facing to this problem and must work rigorously to reduce and separate waste. There is only one landfill in western Tokyo, located in the town of Hinode. Fussa-city and most other cities in Tokyo are utilizing that landfill to dispose of cinders produced after burning waste.

Fussa must strengthen their waste policy and require all citizens to properly separate their waste into Eight categories and to use the designated collection bags for disposing of all Combustible and Incombustible Waste. Several kinds of waste bags are currently available for purchase in Fussa.

There are four areas in Fussa: Central, East, West, and South. Each has its own Calendar for waste Recycling with pick-up dates for the different types of waste. You will be provided with the appropriate schedule or your area.

This handout was written by Fussa City Waste Reduction Division, Yokota Housing Office, and Yokota Environmental Office. If you have any questions or need further assistance, please contact Fussa City Environmental Division at 042-551-1731, Yokota Housing Office at DSN 225-9261, or Yokota Environmental Office at DSN 225-9683.
